

TRIGGERS	DISABILITY	AIRWAY	BREATHING	CIRCULATION	PAIN
	Lethargy / Drowsiness, Floppy, Weak cry, Irritable, (inconsolable cry by parent/carer)	Stridor Snoring Drooling Position (tripod)	Rate, Rhythm Recessions, noises, Accessory muscles - AE, Chest expansion, abdominal breathing, Tracheal position, SpO2 in air	Colour (pale mottles, cyanosis) Peripheral pulses (normal to thready)	Limited movement Distressed Obvious deformity Guarding or posturing Inconsolable
1	Unresponsive Responds only to pain	Obstructed Partially obstructed + Severe respiratory distress	Apnoea , Hypoventilation, Severe respiratory distress	No pulse Bradycardia	
2	Response only to voice Severe decrease in activity	Partially obstructed + moderate respiratory distress	Respiratory distress (severe to moderate)	Severe haemodynamic compromise, uncontrolled bleeding CRFT>4seconds	Severe pain (Pain score 8 – 10)
3	Moderate decrease in activity Recent seizure	Partially obstructed + mild respiratory distress	(අනුරූප විචල්න) සාපේක්ෂ වැඩිදුරු වැඩිදුරු වැඩිදුරු	Moderate haemodynamic compromise , Moderate dehydration , CRFT 2-4sec	Moderate pain (pain score 5-7)
4	Alert to mild decrease in activity	Normal	Mild Respiratory distress to normal	Mild haemodynamic compromise , mild dehydration, CRFT<2 seconds	Mild Pain (Pain score 1-4)
5	Normal	Normal	Normal	Normal	No pain
