

## Corrections.

### Part 3 seriously injured child.

1. Page 120. Blood and fluid therapy in sever uncontrolled hemorrhage after trauma. (Algorithm)  
  
2<sup>nd</sup> bolus- consider resuscitation with blood products if not available give  
  
10ml/kg warmed sodium chloride 0.9%
2. Platelet – 10-15ml/kg

### Part 4 Basic life support.

1. Page 170, 173,174 177,179. Pediatric BLS
  - Need to give a print out of BLS algorithm.
  - 2 rescue breath instead of 5 rescue breath. Ratio 15:2.
2. Page 180,182 choking child algorithm-Need to give a print out.
  - No abdominal thrust
  - 2 rescue breath.
3. Page 204. Management of cardiac arrest – shockable rhythm algorithm
  - Need to give a printout
  - Adrenalin after 2<sup>nd</sup> shock.
  - Only one dose of Amiodarone after 3<sup>rd</sup> shock.
  - If further Amiodarone needed contact experts.
